Saidu B. Samaila – Chamco Digital

www.sbsamailaaccountants.com

AI & Digital Skills Empowerment Partnership

Enterprise-grade AI & Cloud Technology Workforce Training · Microsoft-aligned certification pathways · Delivered live, globally.

A Trusted Alliance for Global Digital Talent

Saidu B. Samaila & Co.

Chartered Accountants · Training & Management Consulting Division

A national and international development firm committed to global growth, with a diversified team of professional accountants, bankers, ICT experts, public-sector specialists and tax practitioners.

Serves as the trusted local gateway to globally recognized certifications — providing admission support, course advisory, payment assistance and exam-prep across the full learning journey.

Chamco Digital LLC

Microsoft Solutions Partner · Houston, Texas

A globally recognized Microsoft solutions partner specializing in enterprise-grade AI technology training and strategic AI transformation initiatives. We empower individuals, communities, institutions, and industries with future-ready digital skills, intelligent solutions, and scalable innovation capabilities that drive sustainable growth and competitive advantage.

Through strategic partnerships across the Microsoft ecosystem, Chamco Digital delivers cutting-edge cloud and AI training programs that equip professionals and organizations with the knowledge and capabilities required to innovate, adapt, and excel in today's rapidly evolving digital economy.

Bridging the AI & Digital Skills Gap

The Challenge

Institutions worldwide struggle to prepare graduates for AI and cloud careers. Too many enter the workforce without the practical, industry-aligned skills today's digital economy demands.

Together, we equip learners with hands-on experience, Microsoft-recognized certifications and real-world projects — so they graduate enterprise-ready.

Our Mission

To empower students and professionals with practical, industry-aligned skills in artificial intelligence and cloud computing — closing the global digital skills gap.

We are committed to fostering innovation, employability and future-ready expertise, so graduates can confidently contribute to AI-driven, cloud-enabled organizations worldwide.

PROGRAM OVERVIEW

The 14-Week AI & Cloud Workforce Program

A structured, cohort-based program blending expert-led live instruction, hands-on labs and capstone projects — aligned to globally recognized Microsoft and cloud certification pathways. Every session is recorded for flexible review.

 14 Weeks Intensive Cohort-based program	 Live + Recorded Delivered on MS Teams	 300+ Certified Instructors Azure, AWS & enterprise	 Microsoft Certifications Industry-recognized
--	--	---	---

PROGRAM FORMAT

- Instructor-led live sessions
- Hands-on labs & simulations
- Weekly assessments & project reviews
- Peer collaboration & team problem-solving

14-Week Online Training Curriculum

- 01**
Python Fundamentals & Data Structures, OOP & Jupyter Notebook
- 02**
File Handling, JSON, CSV & Exceptions & Python Mini Project
- 03**
NumPy for Fast Numerical Computing & Data Preparation with Pandas
- 04**
Exploratory Data Analysis & Data Visualization and Introduction to Machine Learning
- 05**
Get started with AI in Azure & Introduction to natural language processing concepts
- 06**
Get started with AI speech and Computer Vision & Getting started with Information Extraction
- 07**
Microsoft Foundry and Azure AI Solution Planning & Selecting, Deploying and Consuming Generative AI Models
- 08**
Building Generative AI Chat Applications & Retrieval-Augmented Generation with Azure AI Search
- 09**
Tool-Augmented Generative AI Applications & Responsible AI, Safety, Evaluation and Governance
- 10**
Introduction to AI Agents in Microsoft Foundry & Building AI Agents with Knowledge Sources and Tools
- 11**
Advanced Agent Integrations with MCP and Enterprise Systems & Multi-Agent Orchestration with Microsoft Agent Framework
- 12**
Text Analysis and Language AI Solutions & Speech and Audio-Enabled AI Applications
- 13**
Computer Vision and Multimodal Understanding & Image Generation, Image Editing and Visual AI Safety
- 14**
Information Extraction, Document Intelligence and Content Understanding & Enterprise AI Capstone and AI-103 Exam Preparation

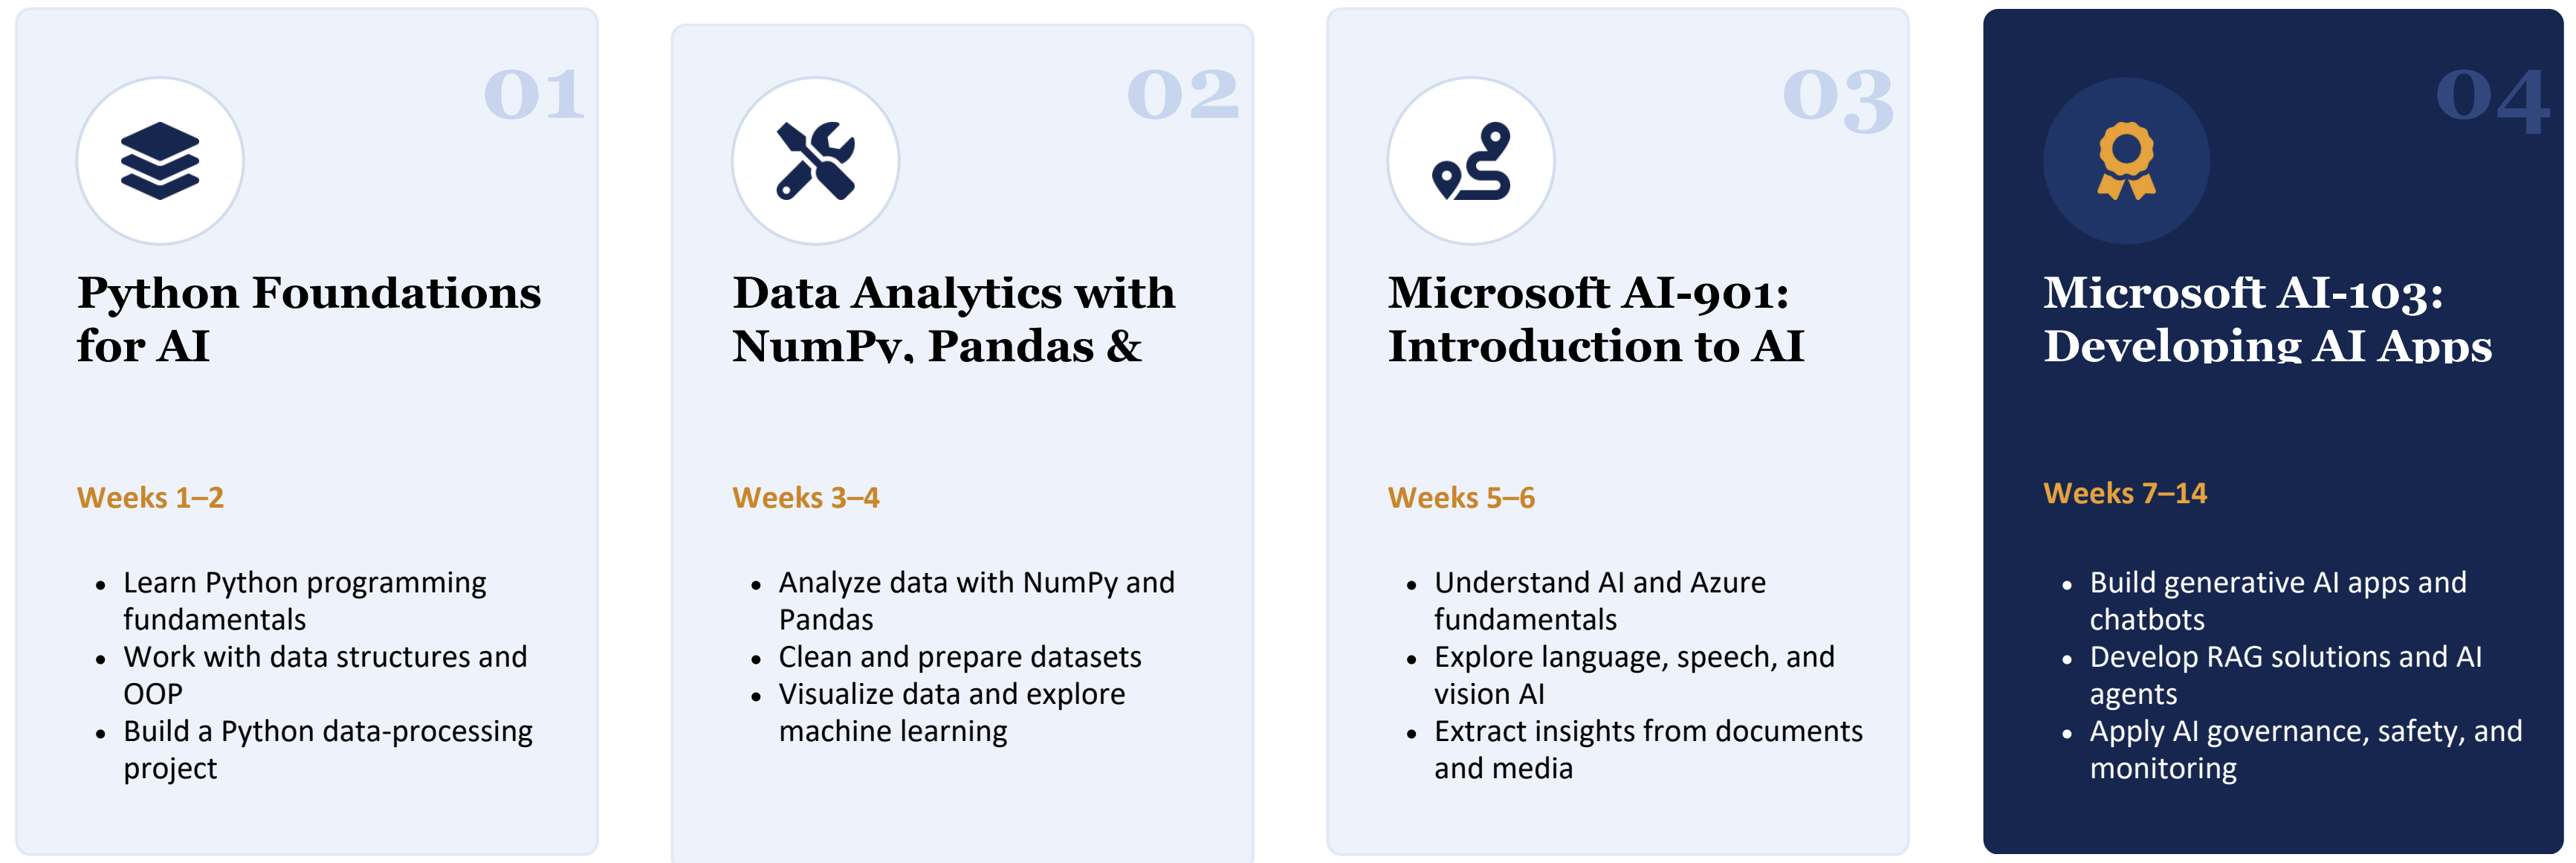

WHO CAN ENROLL?

- Students & Recent Graduates
- Computer Science Students
- Information Technology Students
- Engineering Students
- Mathematics and Statistics Students
- Science and Technology Students
- Recent Graduates seeking tech careers
- NYSC Members looking to transition into technology
- Working Professionals
- Software Developers
- Web Developers
- Mobile App Developers
- System Administrators
- Database Administrators
- Network Engineers
- Innovation Managers
- Career Changers
- Professionals seeking to transition into technology
- IT Support Professionals
- Cyber security Professionals
- Business Analysts
- Project Managers
- Product Managers
- Digital Transformation Officers
- Data & AI Professionals
- Data Analysts
- Data Scientists
- Data Engineers
- Machine Learning Engineers
- AI Engineers
- Business Intelligence Professionals
- Research Analysts
- Cloud & Infrastructure Professionals
- Cloud Engineers
- Cloud Architects
- DevOps Engineers

WHO CAN ENROLL?

- Human Resources Managers
- Recruiters
- Tax Professionals
- Audits and Auditors
- Procurement Officers
- Vendors
- Legal Practitioners
- Media Practitioners
- Policy makers
- Compliance Officers
- Strategic Planners
- Trend Analyst
- Researchers
- Executive Secretaries
- Safety Officers
- Mechanical Engineers
- Record Officers
- Infrastructure Engineers
- Solutions Architects
- Platform Engineers
- Corporate & Public Sector Employees
- Bank Staff
- Fintech Professionals
- Government Employees involved in Digital Transformation
- ICT Officers in Ministries, Departments and Agencies
- Telecom Professionals
- Consulting Professionals
- Entrepreneurs & Business Owners
- Startup Founders
- SME Owners
- Tech Entrepreneurs
- Digital Agency Owners
- Individuals interested in Artificial Intelligence careers
- Professionals seeking remote and international job opportunities
- Freelancers looking to expand into AI and Cloud services

Four Phases to Enterprise Readiness

Specialize Across Four In-Demand Disciplines

Cloud Engineering

- Infrastructure as Code (IaC)
- Virtual networking & security
- Cloud deployment & monitoring

Artificial Intelligence

- Machine learning models
- Deep learning fundamentals
- AI model deployment & scaling

Data Engineering

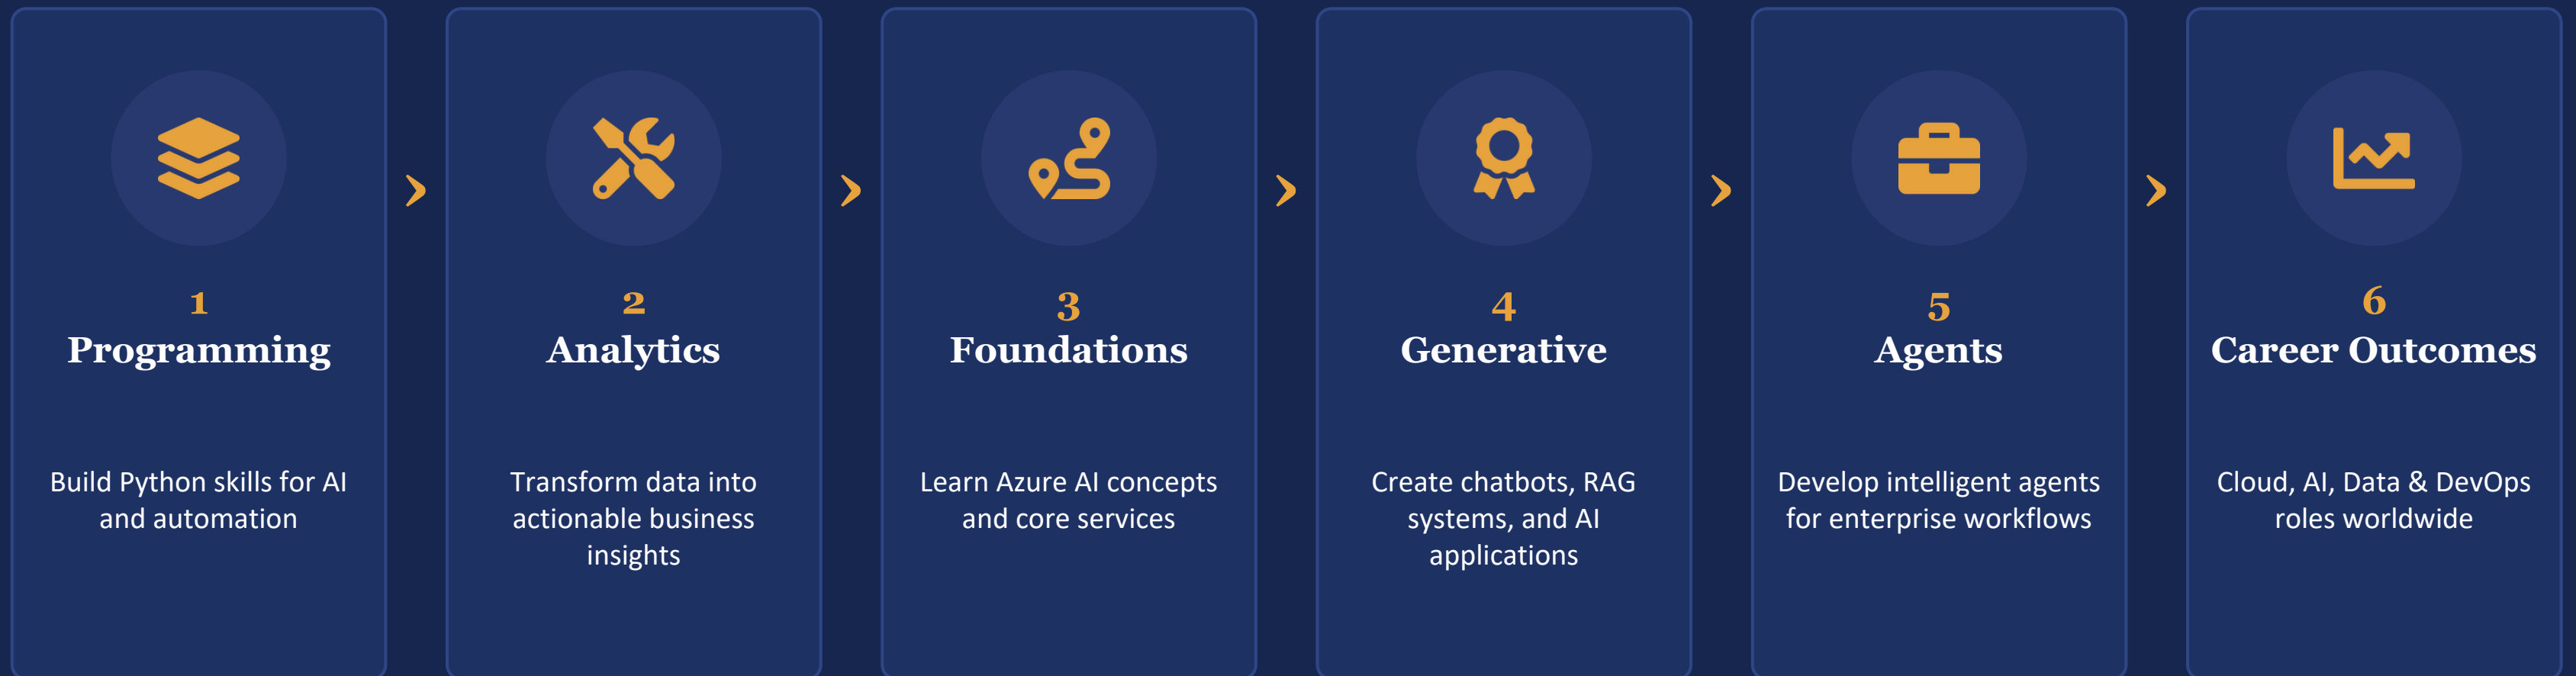

- Data pipelines & ETL processes
- Big data tools & architecture
- Data governance & security

DevOps & Automation

- CI/CD pipelines
- Containerization & orchestration
- Cloud automation tools

From Foundation to a Global Tech Career

Graduate enterprise-ready — with skills aligned to global job-market needs.

What Every Graduate Walks Away With

Industry-Aligned Knowledge

A strong foundation in AI, cloud computing, machine learning and modern AI tools.

Hands-On Experience

Practical labs, real-world projects and case studies that build a professional portfolio.

Certification Readiness

Preparation for Microsoft AI--901 and AI--103 certification exams recognized globally. AI--103 exam vouchers will be issued for successful completion of training program.

Digital Employability

Skills and experience for careers in AI, cloud operations and digital services.

Professional Network

Connections with instructors, industry experts and fellow learners.

Capstone Portfolio

Completed projects that demonstrate real, applied skills to employers.

CAREER OUTCOMES

Roles & Earning Potential

CORPORATE & ORGANIZATIONAL ROLES

- AI Engineer
- Machine Learning Engineer
- Prompt Engineer
- Data Scientist (Junior)
- Cloud Support Engineer
- AI Technical Support Specialist
- DevOps Assistant
- Computer Vision Developer
- NLP Engineer

POSSIBLE ANNUAL INCOME

	Entry-Level per year	\$10K – \$25K
	Mid-Level per year	\$30K – \$70K
	Specialized AI Roles per year	\$80K – \$120K+

Where Graduates Work — and Earn

Remote & Freelance

- Upwork
- Fiverr
- Toptal
- Andela
- Arc.dev
- Braintrust

Industries Hiring

- Tech companies
- Banks & fintech
- Consulting firms
- Government agencies
- Startups
- Int'l organizations

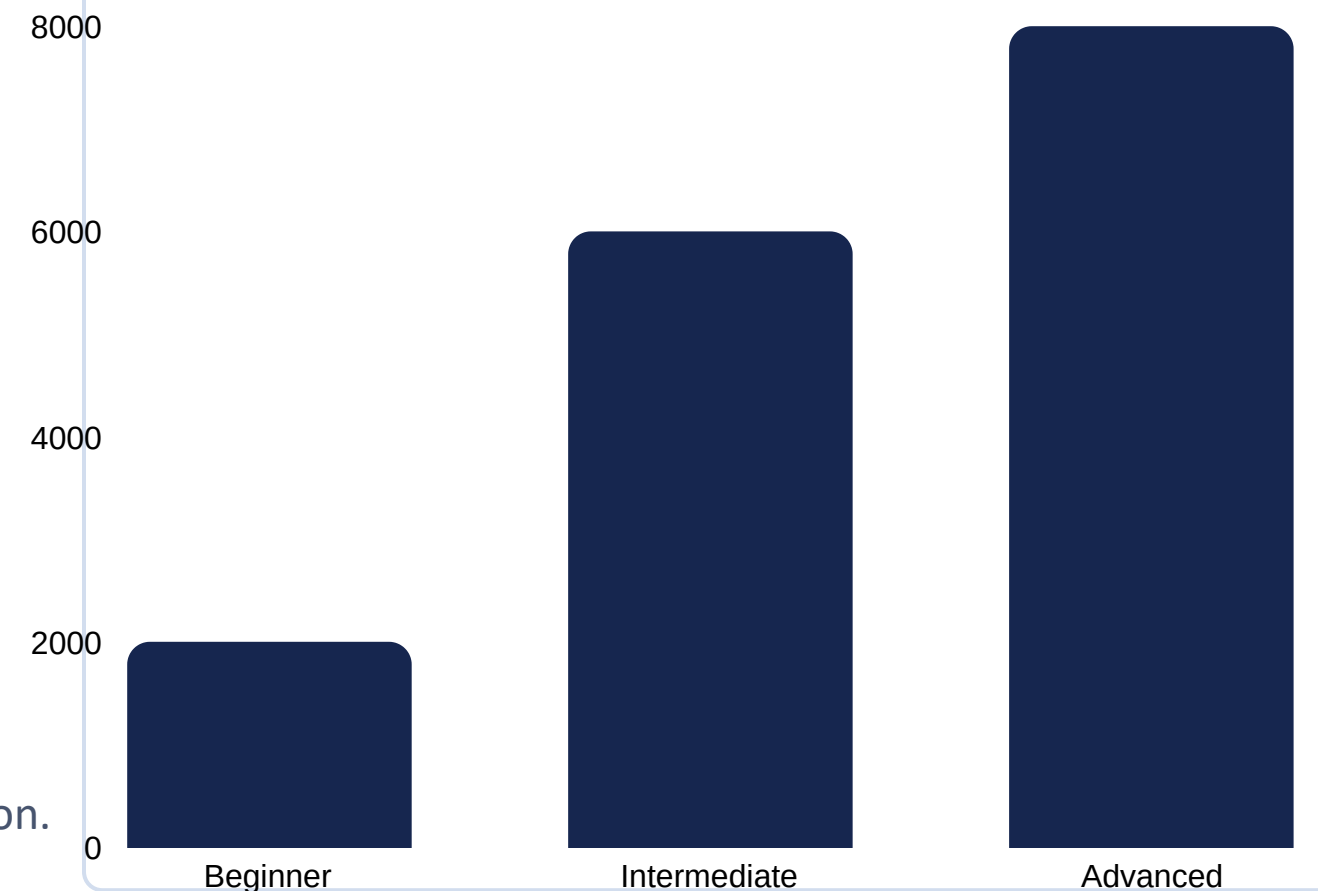

Global Reach

- US companies
- European startups
- African tech firms
- Work remotely
- Get paid in USD

Freelance Monthly Income

Upper-range potential (\$/month)

Beginner \$500–2K · Intermediate \$2K–6K · Advanced \$8K+

Earnings scale with skill level, portfolio depth, specialization (AI > general IT), consistency and communication.

Outcomes Institutions & Governments Can Trust

1000+

Learners trained & empowered

300+

Globally certified instructors

12

Weeks to job-ready skills

100%

Industry-aligned curriculum

Economic Growth

- Reduced digital skills gap
- Higher employability in tech roles
- Accelerated digital transformation
- Inclusive access to high-value careers

Verified Results

- Certification completion rates
- Job placement & transition metrics
- Skills proficiency assessments
- Capstone project validation

Flexible Scale

- Small cohorts to multi-site rollouts
- Consistent training quality
- Standardized curriculum delivery
- Enterprise-grade security

Join the Next Cohort

Enrollment Policy

- Enrollment closes 1–2 weeks before each program start
- Register online via www.chamcodigital.com/learning or www.chamco.ai
- No late entry after commencement
- Late applicants roll into the next cohort
- New cohorts launch monthly for scalable, continuous learning

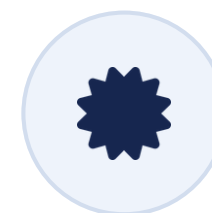

Live on Microsoft Teams

Interactive sessions, all recorded for replay

Monthly Rolling Cohorts

Continuous intakes — start when you're ready

Microsoft Exam Vouchers

Issued on successful program completion

Enroll now at www.chamcodigital.com/learning or www.chamco.ai • Limited seats per cohort — register today.
